Preface

Most computers have built-in or can install this driver automatically when you first connect the control board. If your computer cannot recognize the control board, follow this document to install the driver.

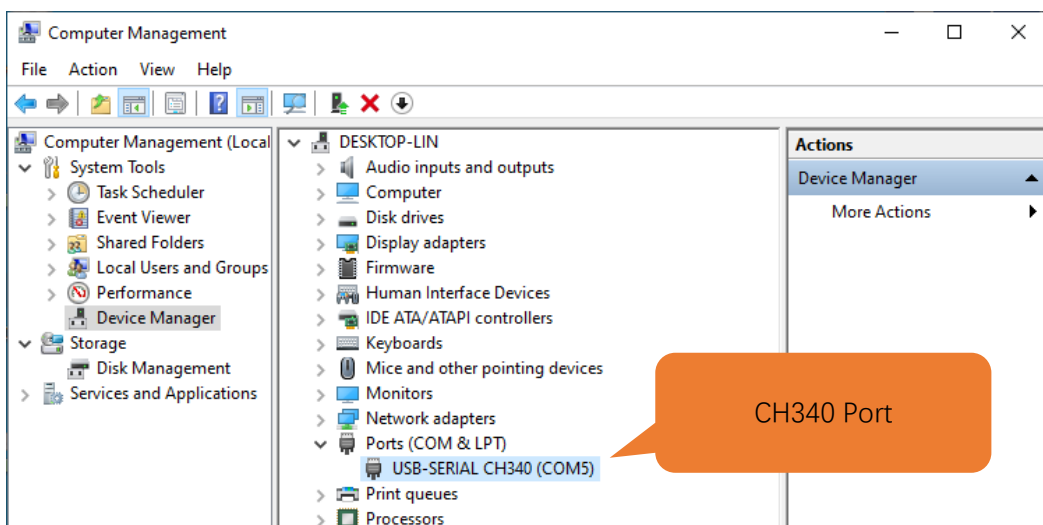

Installing CH340 Driver on Windows

Check the Installation

1. Connect your computer and control board with a USB cable.
2. Go to desktop of your computer, select "This PC" and right-click to select "Manage".

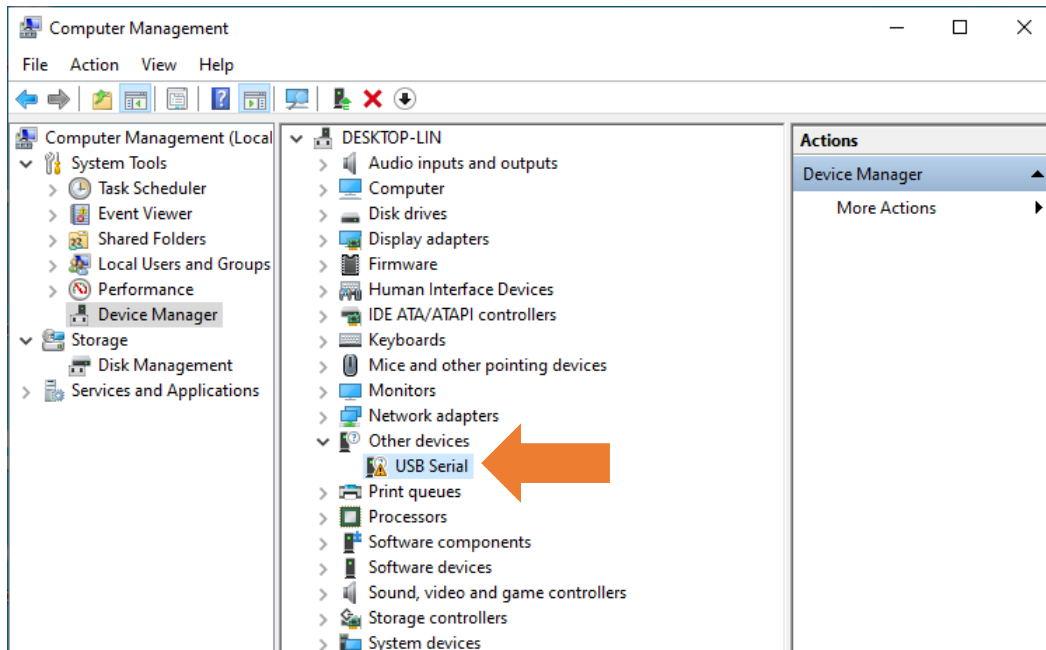

3. Click "Device Manager". If your computer has installed CH340, you can see "USB-SERIAL CH340 (COMx)". Then there is no need to install it again.

Installing Driver

Method 1

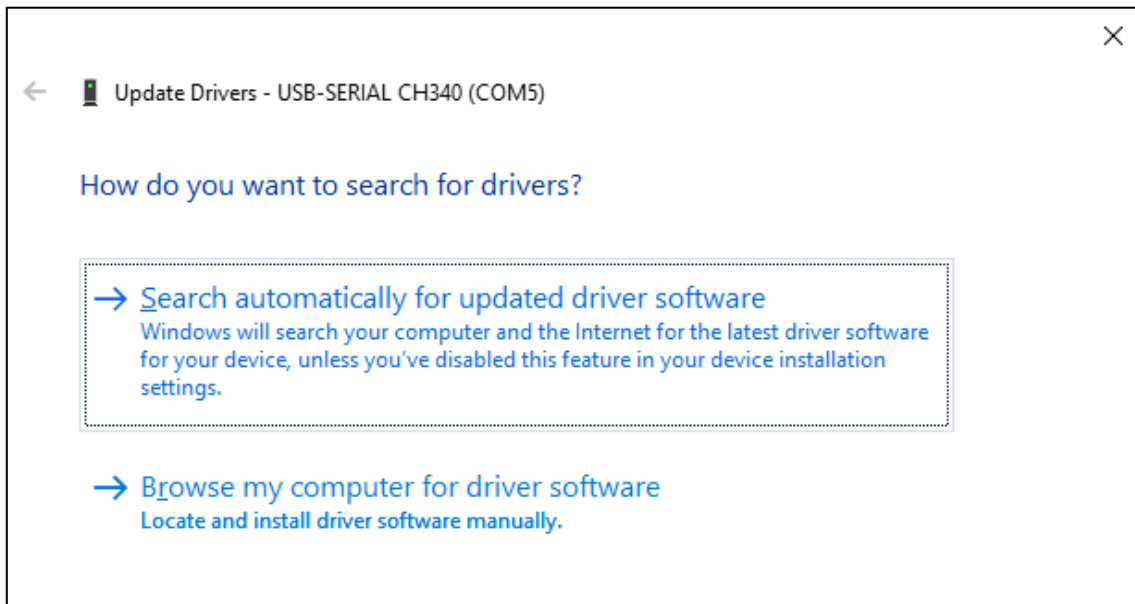

1. If you have not yet installed CH340 driver, you will see the following.

2. Click "USB Serial" and right-click to select "Update driver".

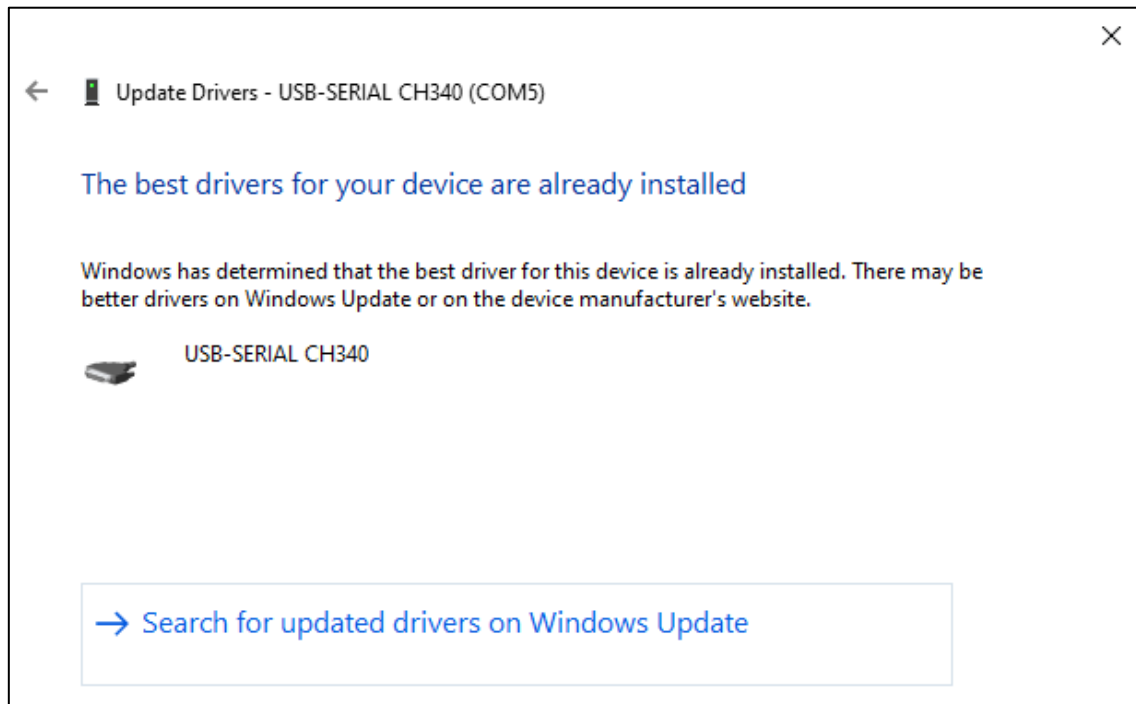

- Click "Search automatically for updated driver software".

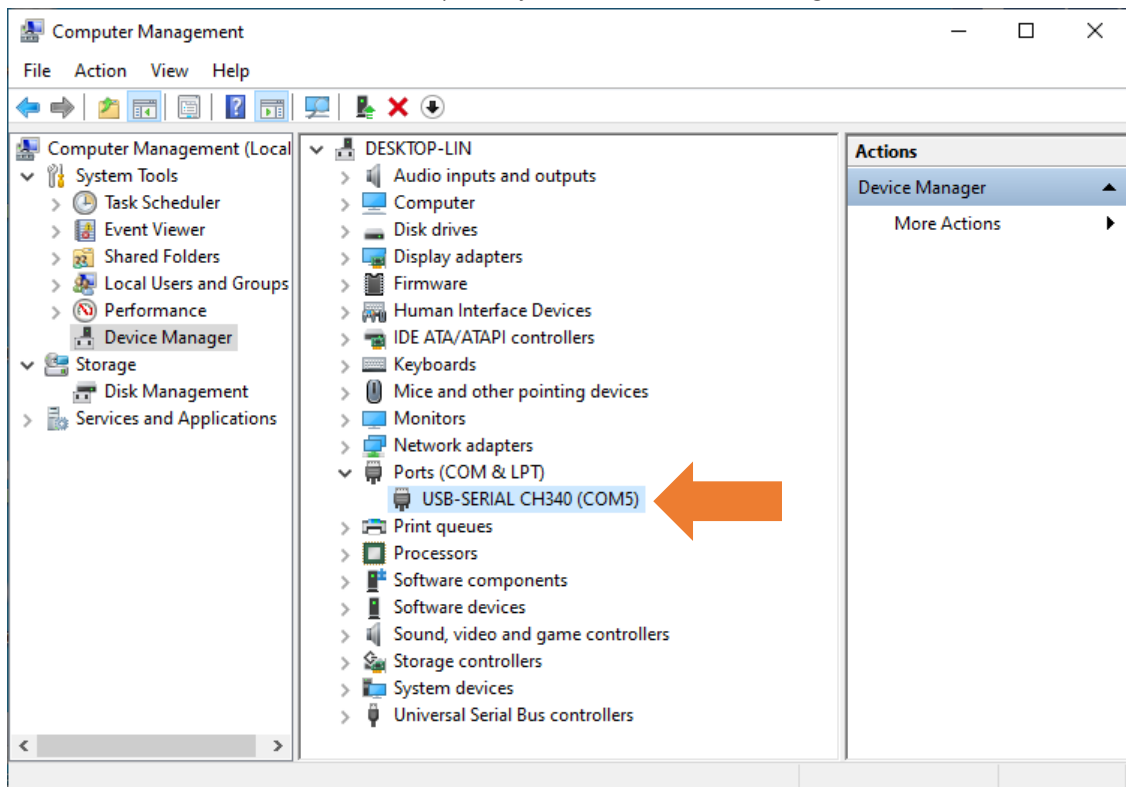

- Wait for CH340 to finish installation.

5. When you see the following interface, it indicates that CH340 driver has been installed to your computer. You can close the window.

6. When control board is connected to computer, you can see the following.

Method 2

- First, download CH340 driver, click <http://www.wch-ic.com/search?q=CH340&t=downloads> to download the appropriate one based on your operating system.
